

Dylan Larrabee

Software Engineer

dylanlarrabee.me

San Francisco, CA | (509) 440-5461 | dylan.r.larrabee@gmail.com

## Technical Skills

*Experienced:* Javascript (+ ES6 ), Node.js, ReactJS, Webpack, Git, HTML5, CSS, Mocha, Chai, Karma

*Strong:* Redux, Docker, A-Frame, PostgreSQL, MySQL, SQLite, MongoDB, D3.js, PassportJS

*Familiar:* Swift, Python, AngularJS, R

---

## Professional Experience

**Hack Reactor**, *Lead Software Engineering Fellow*

2016 - 2017

- Simultaneously mentored multiple engineering teams through code review, debugging, and architecture design
- Built internal tool to increase efficient student-instructor time distribution within the instructional team
- Proctored 100+ technical interviews and mock interviews for prospective students and alumni
- Conducted twice-weekly lectures to 70+ students on algorithms and coding challenges
- Designed and contributed to program curriculum used by thousands of students yearly

**Eastern Washington University**, *Teaching Assistant*

2015 - 2016

- Contributed to department-wide curriculum improvements to boost outcomes of struggling students
- Gained experience with collegiate level pedagogical techniques and strategies
- Organized and proctored study groups focused on confusing technical topics

**Pacific Northwest National Lab**, *Environmental Systems Intern*

2013

- Conducted original microbiological research of geothermal features in the Alvord Desert Basin
- Presented findings to stakeholders to apply for extended funding

---

## Software Engineering Projects

**Ripple** | *Web service integration platform*

- Architected a custom Express backend handling webhooks from 10s of APIs for performing custom actions
- Designed a performance optimized PostgreSQL database allowing fast and concurrent access
- Utilized ReactJS and Redux to design a visual and intuitive UI/UX for new users

**TagMe** | *Photo-journaling app that uses Machine learning to automatically add tags, captions, and geo-locations*

- Integrated S3 Amazon Web Services with MongoDB to optimize backend media storage and retrieval
- Extended functionality of an existing React Native codebase to include geolocation and visualization
- Optimized synchronous and asynchronous API calls for performant user experience

**Markable** | *Chrome Extension for sharing links, markups, and comments with groups, overlaid on any website*

- Designed a performance optimized PostgreSQL database allowing fast and concurrent access
- Used Angular to build a Chrome Extension that handled DOM injection and overlay rendering
- Using Scrum, lead a team of 4 engineers to meet MVP under a tight deadline

**Shakle** | *A functional and educational vanilla JS Promise module for Node.js, hosted on npm*

- Created an educational npm module as resource for those in the JavaScript community to learn about Promises
- Used vanilla JS to build from scratch a Promise class with advanced helper methods

**Please-Contain-Yourself** | *Update this when curriculum is completed*

- Filler Filler Filler Filler Filler Filler Filler Filler Filler Filler Filler Filler Filler... not done yet, will add later
- Filler Filler Filler Filler Filler Filler Filler Filler Filler Filler Filler Filler Filler ... not done yet, will add later

---

## Education

**Hack Reactor**, *Advanced Immersive Software Program*

2016

**Eastern Washington University**, *B.S. in Biology*

2016

- Coursework of Interest: *Data Analysis for Biologists (exposure to the R Language)*

---

## About Me

Since I was a kid I've loved making things. About the time it became socially unacceptable to play with Legos, I discovered that I could tinker with virtual stuff instead. And it's such a blast- I have so much fun taking an idea and literally willing it into existence with code. Oh, and I can't forget jumping on trampolines and watching horror movies. Those are my favorite too.
