Dylan Larrabee
Software Engineer
dylanlarrabee.me

San Francisco, CA | (509) 440-5461 | dylan.r.larrabee@gmail.com

Technical Skills
Experienced: Javascript (+ ES6), Node.js, ReactJS, Webpack, Git, HTML5, CSS, Mocha, Chai, Karma
Strong: Redux, Docker, A-Frame, PostgreSQL, MySQL, SQLite, MongoDB, D3.js, PassportJS
Familiar: Swift, Python, AngularJS, R

Professional Experience
Hack Reactor, *Lead Software Engineering Fellow*   *2016 - 2017*
- Simultaneously mentored multiple engineering teams through code review, debugging, and architecture design
- Built internal tool to increase efficient student-instructor time distribution within the instructional team
- Proctored 100+ technical interviews and mock interviews for prospective students and alumni
- Conducted twice-weekly lectures to 70+ students on algorithms and coding challenges
- Designed and contributed to program curriculum used by thousands of students yearly

Eastern Washington University, *Teaching Assistant*   *2015 - 2016*
- Contributed to department-wide curriculum improvements to boost outcomes of struggling students
- Gained experience with collegiate level pedagogical techniques and strategies
- Public speaking, lecturing, lab oversight/ management (dangerous)

Pacific Northwest National Lab, *Environmental Systems Intern*   *2013*
- Contributed to microbiological research, enhanced technical lab and field skills
- Built internal tool to increase efficient time distribution within the instructional

Software Engineering Projects

Ripple | *Web service integration platform*
- Architected a custom Express backend for handling webhooks from 10s of APIs for performing custom actions
- Designed a performance optimized PostgreSQL database allowing fast and concurrent access
- Utilized ReactJS and Redux to design a visual and intuitive UI/UX for new users

TagMe | *Photo-journaling app that uses Machine learning to automatically add tags, captions, and geo-locations*
- Integrated S3 Amazon Web Services with MongoDB to optimize backend media storage and retrieval
- Extended functionality of an existing React Native codebase to include geolocation and visualization
- Optimized synchronous and asynchronous API calls for performant user experience

Markable | *Chrome Extension for sharing links, markups, and comments with groups, overlaid on any website*
- Designed a performance optimized PostgreSQL database allowing fast and concurrent access
- Used Angular to build a Chrome Extension that handled DOM injection and overlay rendering
- Using Scrum, lead a team of 4 engineers to meet MVP under a tight deadline

Shakle | *A functional and educational vanilla JS Promise module for Node.js, hosted on npm*
- Integrated Flickr's API, AngularJS, and A-Frame to render equirectangular photos in virtual space
- Integrated Flickr's API, AngularJS, and A-Frame to render equirectangular photos in virtual

Please-Contain-Yourself | *Creates Virtual Reality immersion in random photospheres*
- Integrated Flickr's API, AngularJS, and A-Frame to render equirectangular photos in virtual space
- Integrated Flickr's API, AngularJS, and A-Frame to render equirectangular photos in virtual

Education
Hack Reactor, *Advanced Immersive Software Program*   *2016*
Eastern Washington University, *B.S. in Biology*   *2016*
- Coursework of Interest: *Data Analysis for Biologists (exposure to the R Language)*

About Me
Since I was a kid I've loved making things. About the time it became socially unacceptable to play with Legos, I discovered that I could tinker with virtual stuff instead. And it's such a blast- I have so much fun taking an idea and literally willing it into existence with code. Oh, and I can't forget jumping on trampolines and watching horror movies. Those are my favorite too.
